

## IRA E-BULLETIN : ISSUE 2 | APRIL 2020

### THE GUTSY VIRUSES

Dancing around us readily

They are such opportunists

Waiting for a breach in immunity

'You have overcome bacteria

But what about us

We don't give a damn

For your puny flu shots.

For your puny flu shots.

We keep on replicating

Mutating frequently

We are the old inhabitants

You can't do away with us easily.'

They say with a mocking grin

on their spindled face

And go on dancing

With a wild wild gait.

'Where are your vaccines?'

Say Dengue, Chikungunya and Corona

And SAARS, bird flu and MARS

'We are the winners

Over you and your inadequacies.

'But we have grey cells

That you don't have

We are not quitters

In the game of life.

As you will see we dive

In research and experiments

We will know how to overcome

You and your constant wars.
